

1971 INDEX
SECURITY WORLD
Volume VIII

Let us make one thing perfectly clear.

Just *photographing* a holdup man, is often not enough.

A blurred or poorly defined picture is usually not much help in identifying a suspect. Noisy equipment will alert the perpetrator. And, unfortunately, some bank security cameras, at the crucial moment, fail to operate entirely.

The brand new Holmes 35mm Surveillance Camera gives you a new level of reliability, unrivaled clarity, and virtually silent operation. And that's only the beginning. The Holmes 35mm Surveillance Camera System is tamper-proof, features high resolution

blow-up capability, an interchangeable lens system, programmable "suspicion" trigger operation, and an efficient top and front reloading service.

And there's still much more to be told. For the complete picture, complete the coupon.

More than 1,000 bank branches already entrust their photographic surveillance to Holmes. Join them.

**don't be
misled on
CCTV**

You can design and sell a closed circuit TV system against any competition . . . based on any price . . . and meet that installation date . . . without knowing all the CCTV answers. It's easy. Just call the PELCO Engineering Service Desk at Gardena, California (213) 321-5591 and you've got three experienced engineers and lifetime CCTV security specialists to recommend the right equipment . . . give you a firm quote on the cost . . . and meet the delivery date . . . right on the spot. It's a FREE consulting service. It costs you nothing. So, don't be misled on your next CCTV sale. Get the facts fast from your PELCO Engineering Staff. PELCO has everything that's needed in CCTV . . . lenses, cameras, monitors, controls, pan and tilts, housings, cable assemblies and "specials".

Free Brochure

Write for our free brochure "Fundamental Information Applying to CCTV systems". It'll help you to understand the basic requirements of a TV system.

PRESS-AT-ANY-POINT TAPESWITCH DETECTORS *No False Alarms!*

Tapeswitch ribbon and area runners are all-purpose, continuous strip, momentary contactors, that solve alarm, signal and control problems easily. These can be cut to any length and will withstand heavy forces and flexing without damage. Detector cells when placed under valuable objects, actuate the alarm when object is lifted. Write for catalogue and technical bulletins.

Ask Us For More Information

Because we love to talk about this little beauty.

The new DS 501 is the latest advancement in our growing line of ultrasonic intrusion detectors. Typical of all of our products, it's well constructed. Designed to last and be maintenance free. Plus.

Plus. Unlimited Multiple Placement—the DS 501 frequency is precision crystal controlled allowing the installation of several detectors in the same open area without false alarms, and without requiring different channels or frequencies.

Plus. Range Stability—Detection Systems, Inc. a leader in AM and FM processing has designed into the DS 501 a stabilized detection range.

Plus. Range Control—an internally mounted adjustment permits the security range to be varied as needed, from 5 feet minimum to 25 feet nominal at maximum, and within this range there is a uniform "catch" performance.

Plus. Reduced Service Costs—a proven design provides environmental immunity from heaters, bells, air conditioners, and other acoustical noise. Things like range stability, solid state design, and 100% functional testing process ensure that the DS 501 needs little attention after installation.

Plus. Plus. This little beauty comes packaged in an attractive two-tone painted steel case designed for both the rough industrial commercial applications and residential use. An optional walnut case is available for the security minded decorator.

Ask us for more information, we love to talk about the new DS 501.

new ideas to cut losses in RESTAURANTS and BARS

If you're involved in this vulnerable industry, you'll want to take advantage of the security ideas revealed in this series of 3 audio tape cassettes.

Offers practical, cost saving suggestions to protect premises and assets. Covers the entire range of restaurant/bar operations:

- Part I: "Comprehensive Security & Safety Measures"**
- External loss: breaking & entering, souvenir hunters, civil disturbance
 - Internal loss: employee theft & waste, carelessness, collusion
- Part II: "Back-of-the-House" Security In-depth**
- Purchasing controls and procedures • Methods of accountability
 - Production records • Controlling outside contractors • Fire prevention
- Part III: "Front-of-the-House" Security In-depth**
- Patron-management relationship • Dishonest employee practices • Legal problems • Effective insurance programs
 - Handling of cash • Employee safeguards

Features Walter J. Buzby II, hotel/restaurant security consultant, interviewed by Raymond C. Farber, publisher, Security World. Only \$35.00 for complete series of 3 cassettes for use on any standard audio tape cassette player.
